ALUMINIUM COMPOSITE PANEL (ACP):

VBOND® - Aluminium Composite Panel

VBOND® Aluminium Composite Panel is an innovative and versatile composite material, made of non-toxic Low Density Polyethylene, approved and tested by the U.S. FDA.

The polyethylene core is laminated between two high strength coil-coated aluminum sheets in an ISO 9001 accredited environment which ensures we can consistently supply top-quality composite panels.

In application/usage; VBOND® has accepted the challenge to move into the 21st century with high technology for widely used building material such as: Architectural Curtain Wall, Door Panels, Column Covers, Beam Wrap, Hallway, Signage, Spandrel Panels, Interior Decoration, Ceilings, Highway Tunnels, Fascia, Elevator & Escalator, Auto Bodies, Cladding, Balconies & Canopies...etc.

Characteristics:

Light weight, Super Flat and Smooth, Cold weather resistant, Excellent heat and sound insulation, high quality consistency and superior product finishing, economical and substantial, ideal choice to decorate the rooms.
